

How to engage with a guest speaker

1

Learn about the guest

- **Who are they?** Find out what the guest does and why they're special
- **What's the topic?** Look up fun facts or ideas about the topic they'll be speaking on

2

Think of great questions

- **Set a goal:** Think about what you really want to learn
- **Ask why and how:** Ask how they got involved with this topic and why it is important
- **Imagine the future:** Ask about what might happen next with the topic
- **Think big:** Ask how the topic might be helpful for people in other places around the world
- **Be organized:** Write your questions on a tablet or notebook in advance

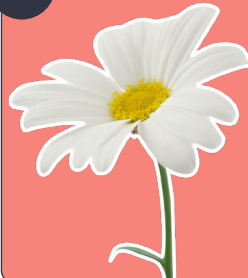

3

Be a good listener

- **Pay attention:** When the guest speaks, listen carefully to what they say
- **Teamwork:** If you're in a group, take turns asking questions or writing down important points
- **Share ideas:** If you have a cool thought, tell the guest and see what they think

4

Be respectful

- **Say thank you:** Show you're grateful for their time or write a thank-you note
- **Highlight something you learned:** Share what you found most valuable about their discussion

5

Stay curious

- **Recap what you learned:** Think of the most exciting thing you learned and research further
- **Explore:** Be open to other areas your research uncovers - the possibilities are endless
